SUMMARY

4+ years designing web and B2B SaaS products, now looking for a senior product designer role. Design Lead at Rsquare Web Studio since Jan 2022, for clients in India, Canada and the UK. Owns a product area from research and IA to flows, prototypes and handoff, then checks the live build in design QA.

EXPERIENCE

Design Lead | Rsquare Web Studio, Thane Jan 2022 - Present

- Led product design for **2 client products** in Canada, from user flows and IA to developer handoff and UAT.
- Scoped RoohConnect's (UK) MVP from market sizing across 4 competitors, chose 2 target niches from 9, and designed its design language system.
- Ran design QA on each build against the Figma files; turned feedback into developer tasks with a priority and owner.
- Partnered daily with developers, sales and client founders.

UI/UX Designer | Student Junction (Skooltag) 2021 - 2022 | [Case study](#)

Delhi NCR school-uniform retailer, offline since 1989, moving online with a parent ordering app and a back office.

- Created Skooltag's **brand identity from zero** (logo, colours, asset kit); it now runs on the store signage.
- Designed the parent app through **5 iterations** around how parents buy in the shop: a child switcher and 3 size checks.
- Handed off **85 app screens in 14 flows** and a 62-screen prototype (665 interactions) with no PM on the team.
- Mapped the back office for admin, store and delivery roles: 3 journey maps, **272 flow steps** and a 15-page SRS.

PROJECTS

Stratalite | Design Lead | Rsquare client [Case study](#)

Vancouver B2B SaaS, live in beta, running property projects for managers, vendors and accounts payable; 5 roles.

- Owned the UX from the first whiteboard: stakeholder map, 4 personas and **11 journey maps** before any screen.
- Defined the IA (**13 sections, 118 screens**), flow boards that doubled as spec, and a 5-role permission matrix.
- Put the invoice inside "Mark as complete" so one action starts payment; traced **6 forms to 18 dashboard outputs**.
- Checked about 200 live-build captures against the designs, then ran **106 UAT cases** that found 6 high-priority issues.

Pacific Coast Contracting | Design Lead | Rsquare client [Case study](#)

Vancouver home-services contractor, split into 4 brands with 4 websites after a recommended brand split.

- Recommended the split into **4 brands and 4 websites** from competitor and keyword research; the client accepted it.
- Planned sitemaps where every page targets one search intent; proposed 2 layouts for the paid-ad landing page.
- Shipped **88 web pages** across 4 sites with the dev team, run from one **258-item tracker** with an owner per item.
- Audited the roofing site against its 64-page sitemap (**20 pages missing**); logged **27 issues** in 4 brand catalogs.

Internal tools | Creator | built with Claude and Codex Rsquare Web Studio

Tools that take manual busywork out of design and QA delivery.

- Built flowmap, a Claude-operated tool that walks a live web app and lays each screen out as a **FigJam flow board**.
- Built and published ExportKit, a Figma Community plugin that exports **WebP and AVIF** with vector detection.

SKILLS

Design: user research, journey maps, wireframing, prototyping, design systems, interaction design, information architecture, user flows, developer handoff

Delivery: requirement documents (SRS), phase planning, UAT and bug logging, design-vs-build review, user roles and permissions, client and developer coordination

Tools: Figma, FigJam, Maze, Notion, Linear, Google Sheets, GA4, Microsoft Clarity, HubSpot, WordPress

Technical: HTML, CSS, JavaScript, Node.js, AI agents (Claude, Codex) for testing and building

EDUCATION

B.E. Computer Engineering | University of Mumbai

2024
